WALDEN WATERSHED STUDY & IMPROVEMENT PLAN Aurora, Ohio

Owner:
City of Aurora

Total Project Cost:
\$1.0 million

Project Completion:
2007

Project Includes:
GPD teamed with an environmental group to develop non-structural restorative solutions to improve channel entrenchment and bank erosion problems within the creek reach. Developed storm water management solutions to further improve hydraulic function throughout the watershed and relieve erosion and flooding problems. The second phase of the project involved detailed design and implementation of the proposed solutions.
